

Ethan Garrison

Full-Stack Software Developer

Orlando, Florida • Egarrisxn@gmail.com

EthanGarrison.com • Github.com/egarrisxn • Linkedin.com/in/ethangarrison

SUMMARY

Full-stack software developer building practical, user-focused applications with React, Next.js, TypeScript, Node.js, and modern database-driven platforms. Takes projects from discovery and technical architecture through development, deployment, and post-launch support. Brings eight years of account management and operations experience, translating real-world business needs into practical technical solutions.

EXPERIENCE

Freelance Full-Stack Software Developer, EthanGarrison.com, Orlando, FL, *Jun 2023 - Present*

- Build and ship modern web applications, handling scoping, architecture, development, and deployment.
- Design database-backed software using Postgres, Sanity CMS, REST APIs, and third-party service integrations.
- Write responsive, accessible front ends in React with an attention to performance, SEO, and maintainability.
- Own the delivery pipeline start to finish: Git workflows, CI/CD, Vercel hosting, DNS, and analytics.
- Support and maintain live sites after launch, including content updates, dependency upgrades, and bug fixes.

Creative Tech and Event Lead, SwayBae.net (Streamer/Content Creator), Orlando, FL, *Jan 2023 - Jan 2026*

- Built and maintained the public site, supporting daily traffic and ongoing content updates.
- Managed the content publishing pipeline and kept messaging consistent across the site and social channels.
- Coordinated production schedules, content calendars, and filming logistics across creative and technical teams.

PROJECTS

QuikRes - AI-assisted resume generation platform

Github.com/egarrisxn/quikres • Quikres.vercel.app

- Converts user-provided LinkedIn profile exports into tailored, role-specific resume drafts.
- Built with Next.js, TypeScript, Supabase, Tailwind CSS.

ManyLinks - Link aggregation platform

Github.com/egarrisxn/manylinks • Manylinks.vercel.app

- Creates customizable public profile pages built to stay fast with minimal client-side JavaScript.
- Built with Next.js, TypeScript, MongoDB, Tailwind CSS.
